1.1 Reporting - NetPro Usage

1.1.1 Types of usage reporting

Usage Reporting is available in SIMPro only for SIMs which make use of our NetPro service and only for Data (not SMS, CSD, or Voice). Also, the usage system does not distinguish between local and roaming usage.

Different types of usage monitoring are available dependant on which MNO is being utilised, if available, usage reporting will be in one of the following types:

- Real time on session close
- Real time on session close and current open session updates at least daily
- Month to date usage, updated every 1-2 hours, including current open sessions

For more information on what each MNO can offer, please speak to your Account Manager.

Usage Data is not based on the mobile networks billing systems and while Wireless Logic make every effort to make the data accurate we do not accept responsibility for omissions or discrepancies.

1.1.2 Generating usage reports

Clicking on Reports and selecting NetPro Usage from the menu will take you to the NetPro Usage Reports screen.

You can select the type of report to run from the report options panel

This screenshot shows the 'Report Options' panel. It contains three dropdown menus: 'Report Type' set to 'Usage by SIM', 'Report Detail' set to 'By Month', and 'Output' set to 'Screen'. A blue 'Go' button is located below the 'Report Type' dropdown.

There are two types of report available

- Usage by SIM
- Usage by Tariff

This screenshot shows the 'NetPro Usage Reports' screen. At the top is a navigation bar with the SIMPro logo and links to Dashboard, SIMs, BillPro, SMS, Billing Accounts, Reports (active), Uploads, and Links. The page title is 'NetPro Usage Reports' with a help icon. A 'Signed in as SIMPro User, Logout' link is in the top right. Below the title is the same 'Report Options' panel as in the previous screenshot. Underneath is a 'Filter' panel with four sections: 'Account' (Wireless Logic Limited, Wireless Logic Limited (Trial)), 'Account Number' (empty text field), 'Network' (Bouygues Telecom, O2, O2 Global, O2 Ireland), and 'Tariff' (BT-000, WL-001, WL-020, WL-110). A 'Month' dropdown is set to 'December 2013'. A blue 'Go' button is at the bottom left of the filter panel, and a 'Clear Filter' button is at the bottom right.

You can use the paste area or alternatively, there are several different filters available to help define the search:

- Network
- Custom Field 1-5
- Tariff
- Month
- Account

Each report can be run to show a month summary or a daily breakdown and each can be viewed either on screen or downloaded (which will be emailed to you).

Filter

Account

Wireless Logic Limited
Wireless Logic Limited (Trial)

Tariff

BT-000
WL-001
WL-020
WL-110

Account Number

Month

December 2013
November 2013
October 2013

Network

Bouygues Telecom
O2

The results can be sorted into either ascending or descending order by using the arrows in the column headers.

Please note the usage on this page is shown in MB.

Clicking on the SIM will take you to the details for that connection, including a graphical display of the month to date GPRS usage over the Wireless Logic private APN's.
